

COLOR PALETTE 1

I chose these colors because it feels more like clouds and the sky. I want to make the website color theme like it is light and that it stores, save, share, create, and process easily. The green and the mute blue and the orange put contrasts to the sky blue, forming an earthly and blue sky scene. This is more fun and relax color theme.

COLOR PALETTE 2

These colors display something new, fresh, and techie. At the same time, the blues comes to play as the blue sky and pale grey as clouds. It is the same reasons why I picked the blues and grey of the sky, for heaven, light, and easy. I want the users to feel happy, fun, but at the same time feel that they can count on us.
